TOP RESULTS WITH CRUMB

A reminder that the best results when crumbing meat are achieved when a pre-coat dip or batter is used. This ensures even coverage of the crumb and of course adds extra weight to the cut and improves the ultimate eating experience for the end customer. Dunninghams **D63** pre-coat batter is used below, **PC Batter** is also great.

Add water to the **D63** dry mix to achieve desired consistency. Dip the meat into batter mix.

Coat thoroughly in crumb.
