# Socks

## Here's a guy that pulled his socks up & got the job done!

The Mid and Below the Knee sock, are perfectly made for feet in gumboots, work boots and sneakers. They're great for hiking and hunting, too. They stay still on your foot, fit snugly, and they don't fall down when you're in a hurry. Whatever the shape of your foot, these socks are made for you.

Rejuvenate your feet! Stop them from feeling cold and tired. The socks have a cushion sole and are terry woven on both sole and upper to keep your feet warm, and with the arch support, comfortable all day.

Our socks last! Mid and below the knee socks are hard wearing and will serve a long sentence. Made from a quality wool blend yarn, combined with nylon at the heel and toe for strength, these socks have a high backed heel to prevent holes appearing where the boot and sock rub together.

No more frustration pairing those socks after the wash! Our socks are colour coded on the heel and toe to each of the four sizes. Colour coded for ease of sorting!

### The Yarns used in our socks

The yarn for the boot socks is an 80% wool and 20% acrylic blend, just the right combination for warm, comfortable, and hard wearing work socks.

All our socks use nylon to strengthen the sock where it's needed at the heel and toe, and Lycra in the top band to keep them keeping up, so they don't fall down.

**Our socks are made for every occasion, they're TOP QUALITY...TOP VALUE.**
