APRONS

Butcher's Bratting Stripe

PU coated nylon, medium weight, white backing, 80% waterproof. Easy wipe-off nylon surface, ideal for bakeries, butcheries and produce, where presentation is important.

DCPR Standard PVC

This butcher's apron is crafted from double-coated polyester, making it completely waterproof. It measures L:1120mm x W:730mm and is made from a popular washdown PVC material, widely favoured by users.

DCPR Extra Large

Double-coated polyester, 100% waterproof butcher's apron. A popular wash down PVC.

APRONS

TPU - Ring Neck Large

This heavy duty apron is made with TPU. It is flexible, durable and hard wearing, resistant to oils and fats which means better hygiene and easy cleaning. Ideal for use in the meat, fish, dairy, farm, and food industries.

TPU - Ring Neck

This heavy duty apron is made with TPU. It is flexible, durable and hard wearing, resistant to oils and fats which means better hygiene and easy cleaning. Ideal for use in the meat, fish, dairy, farm, and food industries.

TPU - Hooklet

Double-coated polyester, 100% waterproof butcher's apron. A popular wash down PVC.

APRONS

Polycotton Bib

65% cotton, 35% polyester, very hard wearing, washes better than cotton. Excellent for silk screening and embroidery. Not recommended for high heat conditions, e.g. ovens and welding. Colourfast, hemmed edges.

U-Safe PVC Strap + Eyelet 0.3mm

High-quality PVC apron. Flexible, blood and fat resistant which assists with better hygiene and easy cleaning. Ideal for use in the food processing industries.

Ideal Chain Mesh

Protective stainless steel apron, protects from cuts caused by the use of professional knives by hand or similar cutting tools, ideal for use in butcher shop, meat processing, etc.

U-Safe Stainless Steel Mesh Apron

Provides ultimate protection while working with sharp knives.

IDEAL MESH GLOVE

*5 Finger - Stainless Steel
Left hand*

For left handed person/to fit right hand.

U-SAFE GLOVE

Stainless Steel

The U-SAFE glove is widely used for cut protection within the poultry, fish and food processing industries. Made from high-quality stainless steel chainmesh, the glove provides excellent protection against both punctures and cuts to the hand. Lightweight, flexible, comfortable to wear, easy to clean.

U-SAFE GAUNTLET

Stainless Steel

The U-SAFE gauntlet is widely used for cut protection within the poultry, fish and food processing industries. Made from high-quality stainless steel chainmesh, the glove provides excellent protection against both punctures and cuts to the hand. Lightweight, flexible, comfortable to wear, easy to clean.

IDEAL MESH GLOVE

Stainless Steel

The Ideal mesh glove is widely used for cut protection within the poultry, fish and food processing industries.

Made from high-quality stainless steel chainmesh, the glove provides excellent protection against both punctures and cuts to the hand. Lightweight, flexible, comfortable to wear, easy to clean. Mesh hook clasp.

EUROFLEX MESH GAUNTLET

80mm Cuff Stainless Steel

Ergonomically designed for perfect fit. Unique grip permits non-tiring operation. All-purpose glove, the cuff bracings are hygienic, flexible and steady.

190mm Cuff Stainless Steel

The stainless steel construction is easy to clean and sanitise, making them a hygienic choice in food preparation environments.

They are resistant to staining and do not absorb odors or flavours from the food, ensuring food safety.

210mm Cuff Stainless Steel

These gloves are highly durable and have a long lifespan when properly cared for. They resist wear and tear, which can save money on replacements over time.

IDEAL GLOVE

75mm Cuff - Stainless Steel

The Ideal glove is widely used for cut protection within the poultry, fish and food processing industries. Made from high-quality stainless steel chainmesh, the glove provides excellent protection against both punctures and cuts to the hand. Lightweight, flexible, comfortable to wear, easy to clean.

150mm Cuff Stainless Steel

Stainless steel mesh gloves are not limited to just one task. They can be used for a variety of kitchen tasks, such as slicing, dicing, chopping, and even handling hot grates or pans on the grill.

190mm Cuff Stainless Steel

Stainless steel mesh gloves are designed to withstand sharp knives, meat cleavers, and other cutting tools commonly used in butchery and cooking. They provide an effective barrier against accidental cuts and punctures, reducing the risk of injuries.

IDEAL GAUNTLET

190mm Cuff

Stainless Steel - Left Hand

For left handed person/to fit right hand.

U-SAFE GAUNTLET

80mm Cuff

Stainless Steel

The U-SAFE gauntlet is widely used for cut protection within the poultry, fish and food processing industries. Made from high-quality stainless steel chainmesh, the glove provides excellent protection against both punctures and cuts to the hand. Lightweight, flexible, comfortable to wear, easy to clean.

150mm Cuff

Stainless Steel

These gauntlet gloves are often heat-resistant, allowing chefs and butchers to work with hot objects, grills, or ovens without burning their hands. This heat resistance is particularly valuable in cooking applications.

GUMBOOTS

Bata Poly - Worklite

The Bata Worklite anti-slip safety gumboots provide outstanding comfort for the longest of days. With excellent insulation, shock-absorbing features, comfortable insoles, plus steel toe protection, these lightweight boots are an instant favourite among the food processing industries.

HANDSAWS & BLADES

Handsaw Complete DMD

Alloy handle and bake frame. Brass tensioner. 20" blade.

HOOKS

Bright handles made of slip resistant, polypropylene. Stainless steel hooks are hardened to a spring temper. For use in abattoirs, butcher shops and boning rooms. Improves worker safety and works well in slippery conditions.

Butcher's hooks, also known as meat hooks or S-hooks, serve various purposes in the meat processing and culinary industries. Here are some common uses of butcher's hooks:

Hanging Meat

The primary use of butcher's hooks is to hang large cuts of meat, such as whole carcasses or sections of meat, in refrigerated storage areas. This allows the meat to age, cool, and dry properly, which can improve its flavour and texture.

Processing and Butchering

Butcher's hooks are essential tools in the butchering process. They are used to suspend meat while it is being cut, trimmed, or deboned. This provides easy access to different parts of the meat and makes the butchering process more efficient.

Smoking and Curing

In smoking and curing processes, meat is often hung from hooks in a smokehouse or curing chamber. The hooks allow the meat to be evenly exposed to smoke, heat, or curing agents, resulting in flavourful and preserved products like smoked sausages, hams, or bacon.

HOOKS

Display and Presentation

Butcher's hooks are sometimes used for displaying cuts of meat in butcher shops or at meat counters in grocery stores. This presentation method can showcase the variety and quality of meats available to customers.

Transportation

When transporting large cuts of meat, especially in meat processing facilities, hooks can be used to secure the meat for safe and efficient movement. They prevent the meat from touching surfaces that could contaminate it.

Home Cooking and BBQ

Some home cooks and barbecue enthusiasts use butcher's hooks for hanging meat over open flames or in smokers. This method can infuse the meat with smoky flavours and allow for even cooking.

Marinating and Seasoning

Hooks can also be used for marinating meat. By hanging meat on hooks in a marinade, it ensures that all sides are evenly coated and infused with flavour. This is especially common in some Asian culinary traditions.

Drying and Aging

In addition to refrigerated storage, hooks are used in specialised meat aging and drying processes, such as making dry-aged beef or cured sausages. Properly hung meat can lose moisture and develop unique flavours and textures over time.

MATS

Dry Area with Yellow Edge

Tough, durable, 4mm vinyl top surface with embossed diamond pattern for foot grip. bevelled yellow edge prevents trips. due to the many multi-purpose uses.

NEEDLES

A trussing needle, for running twine within a rolled roast.

OVERALLS & DUSTCOATS

These durable, comfortable polycotton coats are ideal for the catering sector. It utilises fabric which has been designed to withstand the rigours of the busy workplace. In 65% polyester and 35% cotton this is a durable and comfortable fabric. These simple coats are ideal for food preparation areas.

SALINOMETER

Standard version, for measuring the salinity of a brine mix when curing meat

SCISSORS

Victorinox Shears

A true kitchen all-rounder. The blades are formed of exceptionally hard stainless steel and feature micro-serration to effectively hold different cutting materials in place. The shears feature a cavity designed to crack nuts or to help twist open stubborn jar lids.

Victorinox Universal

Super sharp, stainless steel universal scissors from Victorinox, the Swiss Army people.

SNIPS & PLIERS

Victorinox Multi-Purpose

These multipurpose stainless steel bladed snips, will make a handy addition to the kitchen arsenal, measuring 19cm overall, the strong blades will cut their way through most items in the kitchen.

Sterling's Black Panther Precision Snips

Features:

- High-quality comfort grip handle
- Balanced spring = a loaded return
- Fully adjustable pivot
- Simple safety latch
- Ideal for all industrial applications including: cable, light-gauge aluminium, sheet metal, carpet, Kevlar®, leather, rubber, wire netting, gardening, food prep, camping.

Dick Plier Fish Bone

Strong premium quality fish bone pliers. Removes both large and small fish bones with ease. Stainless steel, dishwasher safe. High quality kitchen tools for professional chefs and household use.

SCRAPERS

Bone Duster Sani Safe

The formed, slip-resistant, easy to clean polypropylene handle and blade combination withstands both high and low temperatures.

Bone Duster Dexter

It helps to clean bone dust from newly cut meat, as well as fat and silver skin from cuts.

Stainless Steel Black Scraper

Table & Floor Scraper removes stubborn food debris from floors and other surfaces with this scraper. Can be used with any Vikan handle.

THERMOMETERS

Delta-Track Digital

Is a waterproof thermometer with an 8 inch sharp tip probe. With a temperature range of -50°C to 200°C, this thermometer is ideal for measuring liquids with very high temperatures such as oils. The thermometer features a min/max reading memory which continuously records the minimum and maximum temperatures until the thermometer shuts off or resets.

iKON Thermometer

Oven safe and easy to use.

Smart Sensor Infrared

Temperature range: -32 - 350°C.

Smart Sensor Infrared

Including certificate. Portability and simplicity one hand operation. Temperature Range: -30°C to 550°C. Display back light feature. Class two laser classification. Fixed emissivity.

TONGS

Stainless Steel Plastic Hand Grip

Stainless steel tongs with colour coded handles to help prevent food contamination.

Their ergonomic handles offer a comfortable grip, while the scalloped edges provide a secure hold on even the most delicate foods. Versatile and easy to clean, our stainless steel tongs are a must have tool for any kitchen.

Whether you're a seasoned chef or just starting your culinary journey, these tongs will quickly become your go-to kitchen companion.

TROLLEYS & BINS

iKON Dixie Trolley

Trolley for No.10 stack and nest trays.

Bin - Wheelie

Wheelie bins are suitable for waste, recycling and organic materials. A medium sized bin popular for lower volume or heavier contents.

STACK & NEST CRATES/LID

(Dixie/Fish Bins) 13 litre - No.4

Suitable for manufacturers, materials handling, engineering, automotive, warehousing and distribution applications. Food grade, ideal for poultry, fish, and meat trades. Flat bottom crates are ideal for use on conveyor belts and roller systems.

STACK & NEST CRATES/LID

(Dixie/Fish Bins)

22 litres/No.5

Suitable for manufacturers, materials handling, engineering, automotive, warehousing and distribution applications. Food grade, ideal for poultry, fish, and meat trades. Flat bottom crates are ideal for use on conveyor belts and roller systems.

STACK & NEST CRATES

32 litres/No.7

In the food, supermarket, fish, and butchery industries, stack and nest crates are indispensable tools that enhance efficiency, promote hygiene, and contribute to a more sustainable future. These versatile containers are more than just storage solutions; they are vital assets that help businesses thrive in the competitive world of food management and distribution.

STECMLA011	Steel Steelmate Steel Holder	
KN18GEN308	Boards For Magnetic Knife Racks	

STACK & NEST CRATES

52 litres/No.10

Stack and nest crates are ingeniously designed to maximize storage space. When not in use, they can be nested inside each other, reducing the need for extensive storage space. However, when filled with products, they can be easily stacked on top of each other, making the most of available vertical space.

68 litres/No.15

In food-related industries, cleanliness is paramount. Stack and nest crates are easy to clean and sanitise, promoting food safety standards. Their smooth surfaces and non-porous materials prevent the accumulation of dirt and bacteria, maintaining a sterile environment for food storage and transportation.

KNIFE/STEEL HOLDERS

Steelmate Steel Holder

Ideal for hooking onto a butchers belt and carrying steels.

Magnetic Knife Racks

With an extra strong magnet to store professional knives and an easy to clean surface, the ideal solution for commercial knife storage.

CALVERT DISPLAY TRAYS

Trays for fresh food, deli and meat displays. Trays enhance the colour of product and provide a solid colour to the back of a food display. Used by butchers, chefs and at home.

Cost-Effective

Plastic trays are an affordable option for butchers, especially when considering their long-term durability. They require minimal maintenance and are resistant to stains, ensuring that they look great for years.

Brand Enhancement

By using uniform, attractive display trays, you create a consistent and professional look for your butcher shop. This can enhance your brand image and leave a lasting impression on customers.

MTA DISPLAY TRAYS

MTA plastic display trays are designed to fit most commonly used display cabinets in butcher shops and supermarkets. 100% food grade approved.

In the world of butchery, presentation is key, and plastic display trays have emerged as a revolutionary tool to elevate your business. These versatile trays offer a plethora of benefits that can transform the way you showcase and sell your products:

Hygiene and Safety

Plastic display trays are easy to clean and sanitise, ensuring the highest standards of hygiene in your butcher shop. With their non-porous surface, they prevent cross-contamination, keeping your meats fresh and safe for consumption.

DISPLAY TRAYS

Durability

Plastic trays are built to last. They are rugged and resistant to wear and tear, ensuring a long-lasting investment that won't need frequent replacements, saving you both time and money.

Customisable

Plastic trays come in a variety of sizes and shapes, allowing you to tailor your displays to fit your specific needs. This adaptability means you can efficiently present different cuts of meat or accommodate varying quantities.

Easy to Handle

These lightweight trays are easy to handle and move around your shop, making rearranging your displays a breeze. Plus, they stack neatly for convenient storage when not in use.

GARNISHES

These garnishes are used to spruce up window displays. We stock everything you need to liven up your displays.

Using plastic garnishes for butcher displays can offer several benefits:

Cost-Effective

Plastic garnishes are typically more affordable than real garnishes like herbs, fruits, or vegetables. They allow you to create appealing displays without the recurring cost of replacing perishable items.

Longevity

Plastic garnishes are durable and can last a long time without wilting or spoiling. This means you can set up attractive displays in advance and leave them in place for extended periods without worrying about freshness.

Consistency

Plastic garnishes maintain their appearance, colour, and shape, ensuring a consistent and uniform look for your displays. This consistency can be challenging to achieve with real garnishes that can vary in quality and appearance.

Hygiene

Plastic garnishes are easy to clean and sanitise, reducing the risk of contamination in your butcher display. Real garnishes may require more frequent replacement due to hygiene concerns.

Reduced Waste

Since plastic garnishes are reusable, they generate less waste compared to real garnishes, which often end up in the bin after use.

OTHERS

Hand Scoop

The scoop's interior contains a measuring scale. Pouring spout on both sides.

Safety Cutters

Designed for cutting thick plastic sheeting, leather, box strapping, belting materials etc. Head design prevents personal injury.

Forks

These forks are great for when you want to anchor the meat, check for tenderness, or serve it with safety.

Caribou Gutting Knife

Is tailored for the professional butcher and ideal for gutting applications. Comprised of high-quality stainless steel, the rigid blade is designed for tougher operations where more strength may be required.

Tenderiser Mallet

This easy-to-use steak hammer is a great accessory for any commercial kitchen specialising in meat or seafood dishes. Lightweight yet strong and robust, it guarantees excellent results time after time when tackling tough meats.

Giesser Brush Steel Block

Tool for cleaning the butcher blocks.

Ingredient Shaker

Ideal if you're making your own rubs.
