VACUUM BAGS
Clear Standard Pouch

Clear vacuum bag allows clear view of product, front and back. Vacuum bags are a popular packaging choice.

- Increase shelf life
- Enhanced sealing capacity
- Superior puncture resistance
- Improve food safety
- Optimise food storage and portion control
- HACCP compatible
- A must in sous vide cooking

VACUUM BAGS
Clear Higher Micron

A thicker version of our standard vacuum bags. Higher micron food grade commercial vacuum bags are suitable for bone-in products, skin on produce and are more reliability with higher temperature sous vide cooking. Where 70 micron bags are not strong enough, 100 micron bags are the best option.

Um = Thickness

FOIL VACUUM POUCHES

Our three side seal pouches, provide a high barrier against oxygen and water vapour, making them ideal for products requiring extended shelf life. Suitable for a wide range of items, from freeze-dried goods to powders and caplets, they can be used for vacuum packing, gas flushing, and heat sealing, while also being recyclable through the Soft Plastics Recycling Scheme.

OVEN VACUUM BAGS
iKON

You get maximum shelf-life, no weight or flavour loss occurs during the cooking process. It applies a uniform heat transfer that reduces cooking time, maintaining quality and flavour.

VACUUM BAGS

COLOURED VACUUM BAGS

Black Back - Clear Front

Black backed, clear front vacuum bag allows clear view of product. Vacuum bags are a popular packaging choice because they increase shelf life, have an enhanced sealing capacity, and superior puncture resistance. They extend shelf life, improve food safety, optimise food storage and portion control, HACCP compatible. A must for sous vide cooking.

ZIP VACUUM BAGS

Ziplock Pouch

Clear ziplock vacuum bag allows a clear view of the product, with the added benefit of a resealable opening.

Black backed, clear front, ziplock vacuum bag allows a clear view of the product, with the added benefit of a resealable opening.

HANG SELL VACUUM BAGS

Hole Punched (Hang)

Hole punched through the top of the bag to allowing it to be hung up on a display. Clear vacuum bag allows clear view of product, front and back.

Add a touch of prestige to your products but displaying in gold or black backed vacuum bags.

CLEAR SHRINK VACUUM BAGS

50 Micron - Flat Pack

Designed to deliver ultimate protection while maximising shelf life and maintaining a fresh product appearance.

Clear shrink vacuum bags, also known as vacuum shrink bags or vacuum packaging bags, serve various purposes across different industries and households. These bags are typically made from a high-quality, clear plastic material and are designed to remove air from the bag to preserve and protect the contents. Here are some common uses of clear shrink vacuum bags:

Food Preservation

Widely used in the food industry and in households to extend the shelf life of perishable items such as meat, fish, vegetables, and fruits. By removing the air and sealing the bags, they help prevent freezer burn and maintain the freshness of the food.

Marinating

Vacuum bags are used for marinating meats and other foods more effectively. The vacuum sealed environment allows the marinade to penetrate the food more deeply and quickly, enhancing flavour.

Sous Vide Cooking

Vacuum sealed bags are a key component of sous vide cooking. The airtight seal ensures that food is cooked evenly in a water bath, retaining its flavour and moisture.

CLEAR SHRINK VACUUM BAGS

60/80 Micron - Flat Pack

Designed to deliver ultimate protection while maximising shelf life and maintaining a fresh product appearance.

CS = Curved Seal

95 Micron - Clear Bag
No boneguard required

Designed especially for high abuse bone-in products, either fresh or frozen, with extra high puncture resistance to avoid leaks during transportation and storage.

No additional boneguard cloth is necessary.

Perforated On A Roll

Designed to deliver ultimate protection while maximising shelf life and maintaining a fresh product appearance.

HAM VACUUM BAGS

Plain Clear Flat Pack

Almost any bag can be perforated on a roll.

Note: carton quantity may change without notice.

BONEGUARD
White, Brown & Clear

Boneguards are placed over the exposed bone to protect the food packaging from puncturing and causing leakage.

Used with a variety of meat packaging solutions, including hams, preformed trays, and vacuum type packaging.

Protect your packaging from sharp or jagged meat, pork or ham bones with bone guard sheets and rolls.

POLY BAGS

Translucent

Used to pack fruit, vegetables & other loose items while shopping. Perforated for easy tear off.

CARTON/ DIXIE LINERS

When it comes to protecting produce in the food industry in particular, hygiene is crucial and these liners will prevent any means of contamination. Place the bag into a box, shipping boxes or crates, placing it over the edges for a secure fit and then fill as necessary. The bags can be used for a variety of items such as food produce and items that need a waterproof lining, or oily components.

CELLOPHANE BAGS

Effortlessly showcase your food offerings with these flat plain clear bags, providing an ideal presentation solution.

ZIPLOCK BAGS

Ziplock vacuum bag allows a clear view of the product, with the added benefit of a resealable opening. Vacuum bags are a popular packaging choice because they increase shelf life, have an enhanced sealing capacity, and superior puncture resistance. They extend shelf life, improve food safety, optimise food storage and portion control, HACCP compatible.

BOXES
Meat & Burgers

Cardboard burger boxes are versatile packaging solutions that serve various purposes beyond just holding burgers. Here are some common uses for cardboard burger boxes:

- Food packaging
- Takeout containers
- Food storage

TISSUETHENE
Sanitary Food Handling

In butcheries, deli sheets are often used to handle raw meat and seafood.

Lining Trays and Baskets

Deli sheets can be used to line serving trays, baskets, and display cases in cafes.

Baking

In cafes, deli sheets can be used as liners for baking sheets or trays when making pastries, cookies, or other baked goods. They prevent sticking and make it easier to remove the baked items.

Cheese and Charcuterie

Deli sheets are often used as a base for presenting cheese and charcuterie boards. They can be arranged under the cheeses and meats for an attractive and clean presentation.

NETTING

Metranet

Metranet only stretches width (not width and length like springnet). This is used for rolled roasts.

Code	Description	Colour	Length of Roll (m)	Product Image

NETTING

Netlon

Netlon bags are ideal for packing garlic, fruit, vegetables, nuts etc.

Smokenet

Cloth netting used to hold your ham together throughout the smoking process. Allows the smoke to penetrate the netting whilst still maintaining optimum moisture levels inside.

NETTING LOADERS

For easy loading and applying netting to products

CLOTHS

Stockinette DMD

Made of highly-absorbent durable cotton. Suitable for cleaning, painting and polishing.

Stockinette Roll Rayon

Stockinette Roll is a very absorbent lint free cloth roll used to apply wax and for buffing up the wax, also ideal for applying spirit and water based stains.

TRUSS LOOPS

Ideal for binding poultry, birds and meat. These loops have been specially designed to contain the animals limbs to be spit roasted.

BUTCHERS PAPER

BBQ Peach Paper

100% food grade, thick and robust paper, increased strength when wet. This means you can wrap raw meat with it, use it in your smoker while cooking and it won't fall apart or leak.

French Butcher Deli Paper - iKON

- Available in 2 colours (pink and white check or brown)
- Three sizes of each colour available
- Environmentally friendly alternative to plastic bags
- Unique to Dunninghams and direct from France

Waxed Patty Sheets

Burger pattie paper is ease to separate from the patties when the wax papers sheets to put between the patties and great for separating burgers after using a press.

Non stick. These patty papers can be 100% water and oil resistant that kept your food fresh. You can use the pattie paper for pressing hamburgers and stacking patties to cook or freeze. It's easy to use and store.

BUTCHERS PAPER

Sandow Paper

- Wrapping meat
- Meat storage
- Displaying cuts of meat
- Absorbing excess moisture
- Protecting meat during storage and transportation
- Smoking meat

Dispenser

Durable paper roll dispenser features a heavy cutting bar making dispensing paper fast and efficient.

Sandow Sheets

Conveniently cut to size.

OTHER PAPER

Deli Wrap Waxed

Deli-Wrap has light wax coverage on both sides, creating a food wrap with a good moisture barrier, also allowing breathability. It's perfect for wrapping sandwiches, bakery items, and seafood.

Meat Saver Paper

Suitable for red meat.

Newsprint

Perfect for wrapping fish and chips.

SHANK CAPS

Designed to fit over bones, preventing potentially sharp bones from piercing the external packaging during the vacuuming process.

STAPLERS

Max Packner HR PS 2

Max HR-PS II manual hermetic bag sealer (Packner). Seals polybags air and water tight.

Hog Ring Pliers Bostich

Designed for fastening ropes, cords, cables and fabrics or materials to wire frames.

STAPLES

STRETCH FILM

Food wrap, 1200 meters. Ideal for use in restaurants, cafes and catering environments. It can be used to cover bowls and tubs, or wrap food directly to keep it fresher for longer.

SEE MACHINERY SECTION FOR STRETCH FILM WRAPPERS

TAPE

Dispensers

Fast and easy to use, one motion wraps tape around neck of bag so it sticks to itself. It can be used with poly and cellophane bags. Built-in trimmer cuts tape and seals bag to size.

Bag Neck Sealers & Tapes

Dunninghams provides a wide range of tapes for multi purpose uses.

TWINE

Twine is a versatile tool in the field of butchery, where it is commonly used for various purposes. Here are some of the primary uses of twine in butchery:

Trussing Poultry and Meat

Twine is often used to truss or tie poultry, such as chickens and turkeys, as well as cuts of meat like roasts or stuffed meats. Trussing helps maintain the shape of the meat during cooking, ensuring even cooking and presentation.

Securing Stuffed Meat

When preparing stuffed meats, twine is used to tie the opening of the meat to keep the stuffing inside during cooking. This helps in preventing the stuffing from spilling out and helps the meat cook evenly.

Creating Butcher's Knots

Butcher's knots are specialised knots used to tie off sausages and other meat products during the sausage-making process. These knots are essential for sealing sausages and ensuring that they hold their shape.

Hanging and Aging

In some cases, twine is used to hang meats for aging, especially in traditional or artisanal butchery. The twine is used to secure the meat to hooks or racks for the aging process.

Identifying Cuts

Butchers may use twine to label or mark specific cuts of meat. For example, they might tie coloured twine around different cuts to easily distinguish between them.

Supporting Bone-In Cuts

When dealing with bone-in cuts of meat, twine can be used to secure the bones in place, preventing them from moving during cooking and making carving easier.

MAP TRAYS

Mono PET - iKON

Kerbside recyclable trays

Meat Display

Mono PET trays are commonly used for displaying various cuts of meat, such as steaks, chops, ground meat, and poultry. They provide a clean and attractive presentation,

Hygiene

PET trays are easy to clean and sanitize, which is crucial for maintaining hygiene standards in a butchery. They can be washed and reused or disposed of after use to prevent cross-contamination.

Protection

They can be sealed with plastic wrap or a lid to create a barrier that keeps meat fresh and prevents it from coming into contact with other products or foreign substances.

PET LIQUID LOCK

iKON Trays

Kerbside recyclable trays

Liquid Lock is a revolutionary new honeycomb design that locks excess moisture in place without the need of a soaker pad. It's made from a high clarity food grade RPET, which is a general-purpose thermoplastic polymer, and is one of the most recycled thermoplastics.

The benefits of Liquid Lock to you and your business are massive:

- 100% recyclable
- Strong
- Lightweight
- Durable
- Made from a high clarity food grade RPET
- Great for both machine and hand wrapping
- Better shelf performance

CPET TRAYS

iKON Trays

Made from CPET (Crystalline Polyethylene Terephthalate), our meal containers are ideal for hot and cold convenience meals. The temperature usage range is very wide, from -40°C to +220°C, making CPET meal trays suitable for use in freezers, microwaves and ovens. These are designed to resist fats, oils and sugars.

Heat seal lid options are available for tamper evident seals, and polypropylene lids are available on some tray sizes. Used containers are ideal for recycling, recyclers would prefer these to be cleaned before deposited.

R-CPET TRAYS

iKON Trays
Kerbside recyclable trays

LIDDING FILM

Suitable for Mono PET

- Easy peel
- Anti-fog
- High barrier
- Suitable for the oven

Suitable for Mono PET

- Lock seal
- Anti-fog
- High barrier
- Suitable for the oven

Note: other sizes available on request

Suitable for PE Lined Tray

- Easy peel
- Suitable for the oven

iKON Tray Sealers

The manual tray sealer can be used for Mono PET or CPET packaging of ready meals, fresh and cooked meats, seafood, dairy, vegetables and salads, baked foods, fruit and much more.

Simple and economical to use, the manual tray sealer uses heat to seal the lidding film to CPET trays and is suited to retail food businesses, commercial kitchens and small food processing businesses.

THERMOFORM

Product Information

Thermoforming films can offer a cost-effective way to package various products. Thermoformer machines are automatic horizontal packaging machines that form packs using a top and bottom roll of film. During operation, the bottom film is shaped, forming a pocket or pack. Product is then placed in the pack utilising the available loading area. The packs, now ladened with product, advance to a sealing station where vacuum is drawn to remove the air and, if necessary, add gas for modified atmosphere (MAP). The top film seals a lid over the packs and the individual packs are separated as part of the process. This packing option can be a great cost saver for a growing business that needs to keep up with demand and growth without impacting shelf life.

Features

- Shelf-life extension
- Both high and medium barriers are available to extend the shelf-life of your product whilst maintaining the quality
- Depending on your machinery and application, various structures, sizes and roll lengths can be produced to suit your specific needs
- Light weight and easy to transport making it more efficient and better for your carbon footprint
- Customisable design of the material to suit the application
- Fully printed options using up to 12 colours
- Films available in both matt and gloss print options

Film Options

Dunninghams have extended our range of thermoform webs we carry in stock with various widths, thicknesses and a few others options to suit various applications. Talk to us about your custom requirements as we can help you out. We can now offer thermoform films for all applications from standard flexible films, semi rigid, boilable, cook in, retort, breathable, high puncture resistant and everything in between and not to forget custom printed designs and in various materials to suit what your needs are.

COMPOSTABLE

Produce Bags

Home compostable produce fruit and vegetable bags are the perfect partner for packing foods, meats, seafood and general re-packing in warehouse environments.

Vacuum Bags

Certified home compostable. Doesn't break down in the carton, only when it goes in to the ground. 100% break down within 26 weeks. Fully toxin free. Worm friendly.

Stand-up Pouches

Compostable transparent pouches are a great alternative to petroleum-based plastics. Flexible pouches are lightweight and durable - reducing shipping costs and overall carbon footprint. A closeable zipper ensures that your product stays fresh, transparent material allows customers to view contents. Perfect for packaging dry foods, health products, subscriptions and refills, as well as non-food items.

STAND UP POUCHES

Clear Front, Silver Back

Stand up Pouches with foil backs that can help your product stand out on the shelf. High Barrier pouches with zipper and tear nicks and suitable for use packing a wide range of products from dry goods to liquids and most things in between. Can be heat sealed, vacuum packed or used with gas flush processes. Recyclable via the Soft Plastics Recycling Scheme.

Foil

Stand up pouch with zipper. Fits 1kg of most powders, high barrier against oxygen, water and aromas. Can be used for multiple products that need added protection. Can be used for heat seal, vacuum packing and gas flush applications. Recyclable via the Soft Plastics Recycling Scheme.

Kraft

Stand up pouches with foil inner and zipper. Three sized pouches to suit 250g, 500g and 1kg (based on water fill weight to zipper) and suitable for a large range of products and packing applications.

Matt Black/White

Foil stand up pouches with zipper and tear notches. Great shelf appeal with these and they are suitable for gas flush, vacuum packing and heat sealing, they can offer extended shelf life versus standard clear pouches as are high barrier using metalised foil. We have three sizes to suit 250g, 500g and 1kg (based on water fill weight to zipper) and suitable for a large range of products. Recyclable via the Soft Plastics Recycling Scheme.

For any customer specific sizes, print designs or products you want to pack please speak to the team and we can sort out your packaging requirements.

The Industry Specialist

Ennio has a reputation for innovation and problem solving, with a long history of working with customers to give them a competitive edge in the marketplace.

Spring-Net
Elastic Netting

Spring-Net Product Benefits
- Patented web stitch design, easiest peel
- 2-Way stretch provides optimum pressure
- Better binding and overall shape
- Strip loss greatly reduced
- No expensive films required

Use Spring-Net for roasting, smoking and water cooking.

Available in Various Strengths
- Light: L5
- Heavy: H3
- Extra Heavy: X3

ennio Spring-Net is the easiest to peel of any elastic netting.

DEXTER
Personal grip filleting knife

Moldable handle material allows the user to form each handle to their particular grip, making the handle more comfortable to use and easier to grip.

KNIDXURCUT8

Dimensions: 20cm
Colour: Orange

How to mold

STEP 1: use oven mitt/pliers to hold the blade. Dip the handle in boiling water to just cover the handle, without the knife blade touching the sides or bottom of the pot.

STEP 2: Hold it in the water for 2 minutes.

STEP 3: Remove from the water and dip in cold water for 1 second, then grip the handle as if using, then squeeze.

STEP 4: Dip the handle in cold water for 10 seconds to maintain the shape.

STEP 5: Let it cool before using.
